Optional Webinar: *A Pathway to Digitizing Your Stormwater Program* by Forester University
from 11 am – 12:30 pm

The webinar will begin with a brief introduction of digital technologies and the advantages such tools offer. Next, the webinar will dive into how to evaluate these tools. Following on this, the webinar will introduce several common procurement models and how to frame the business case to stakeholders. The webinar will then conclude by diving into specific feature requirements you should look for around data collection, workflow management, and data analysis so that digitization yields the greatest possible gains.
