

White Pine **(Pinus strobus)**

50 to 80' tall by 30-50' wide, up to 100' tall, fast growing,
conical in form when young, becoming picturesque with age.

Thin flexible needles, 4" long, light green with a bluish cast.

Light brown 6-8" cones, often numerous.

Smooth gray to gray-green bark, furrowed with age.

Prefers sun and moist, well-drained, slightly acidic soil;
easily transplanted, easily grown,
not tolerant of strong winds, salt, vulnerable to ice/heavy snows

Good specimen for parks or other large spaces, as Christmas tree

New England native.
